

# AIR SHOTS - Bird's Eye Views – Pics & Vids

*Roof inspections, property photos, and a few fun things in between.*

Here's the thing about drones — they go where you can't. Up on the roof. Over the back forty. Around the whole property. And they bring back pictures that are genuinely impressive.

I'm Richard Erschik — an FAA-certified commercial drone pilot based in Southwest Florida. I keep it simple, I keep it affordable, and I show up when I say I will.

## Roof Inspections

This is what I do most — and it's one of the most useful things a drone can do.

- Storm and wind damage assessment
- Condition before or after repairs
- Peace of mind — no climbing required
- Insurance documentation photos
- Pre-purchase property inspection
- Gutters, drainage, hard-to-see areas

*No ladders. No risk. Clear photos delivered to your phone or email.*

## Personal Property & Fun Stuff

Not everything has to be serious. Sometimes you just want a great shot.

- Your boat — on the water or at the dock
- Your car, truck, or motorcycle
- Your home, property, or land
- A family gathering or backyard event
- A beautiful sunset over your place

*Great for gifts, framed prints, or bragging rights on social media.*

## How It Works

Call or text me. Tell me what you want to shoot. I'll let you know if the location needs FAA authorization — I handle all of that. We pick a day, I show up, I fly, you get your pics/vids. Done!
